## Professional Summary

Results-driven software developer with a MSc in Telecommunications and over four years of experience in web development, specialising in JavaScript frameworks like Vue and React. Proven expertise in creating responsive user interfaces, real-time data management solutions, and seamless integrations. Seeking to bring strong front-end development and system optimisation skills to innovative software development teams. Fluent in English, Spanish, and Portuguese.

## Key Skills

- Programming Languages: JavaScript
- Frontend: React, Vue, HTML5, CSS3
- Backend: Node.js, Express.js, MongoDB
- Tools: Nuxt.js, TailwindCSS, Firebase

- Version Control: Git & GitHub
- Development Tools: VSCode
- Design Tools: Figma
- Multilingual: English, Spanish and Portuguese

## Software Developer Experience

### Freelance Developer

*POMOC* | Jan 2024 – Present

- Designing and maintaining various sections of the website using Squarespace, enhancing user experience and optimising performance.
- Delivering polished, client-approved updates and designs to ensure functionality and aesthetic alignment.
- Integrated Stripe for seamless payment processing and Action Network for streamlined user engagement.
- Created and styled a dynamic carousel feature, enhancing the site's visual appeal and user interactivity.

### Front End Engineer

*RCCO, London/Remote* | Nov 2020 – May 2023

- Developed interactive web applications using Nuxt.js, enhancing user engagement and experience, as part of a 5-member team to support a platform that later secured a one-and-a-half-year contract with Google.
- Implemented responsive UI designs with Tailwind CSS, ensuring a seamless experience across devices.
- Integrated Firebase for real-time database management and authentication, increasing data handling efficiency and reducing data sync issues.
- Established a content management system (CMS), enabling non-technical team members to independently manage site content, significantly reducing content update time.

### Junior Cloud Developer

*One Advanced, London* | Nov 2018 – Apr 2019

- Administered SharePoint as a server administrator, resolving technical incidents to maintain seamless operations and uptime.
- Developed and implemented custom React and Redux web parts for SharePoint, improving user interface functionality and streamlining front-end workflows.
- Supported backend integrations and managed server configurations, enhancing data flow and overall system performance.

## Other Employment History

### Sous Chef/Chef de Partie

*Coopers/Evolve Hospitality* | Nov 2023 - Present

- Managing day-to-day kitchen operations, ensuring smooth and efficient service.
- Directly responsible for line managing a team of two.

**Projects**

[Showcase](#) – *Portfolio Platform for RCCO*                          Vue.js, Nuxt.js, Three.js, TailwindCSS
Developed a portfolio platform for RCCO, showcasing client projects. Integrated Three.js for interactive 3D elements and used TailwindCSS for responsive design.

[Funky Clothes](#) – *E-commerce Platform*                          React, Redux, Stripe, Firebase (Social Login)
Built an e-commerce platform allowing users to sign up, use Google social login, select clothes by category, add items to the cart, and complete purchases via Stripe.

[Who is younger? Who is older?](#)                          React, PostgreSQL, Node, Express, Clarifai API
Created an app where users can upload a photo with multiple faces, and the app detects and compares ages using a magenta-to-dark-blue gradient.

[Vue Food App](#)                          Vue, Vue-Router
Built a food selection app where users can search meals by category and add favourites to their cart.
